

Bespoke Joinery Solutions
Dispensary Solutions V1.1

Product guide and technical information
sheet

Supplying the healthcare industry for over twenty years...

Plumline Bespoke Joinery have been producing Dispensary and Pharmacy solutions for over twenty years. Our expertise in this field has helped pioneer Pharmacy solutions for both major retailers and independent pharmacies up and down the country.

Using state of the art CNC machinery and Beam saw cutting technology in our 50,000 sq ft factory we are able to offer a single cabinet or a complete dispensary, delivered to your door in our own fleet of vehicles. Our factory facility based in Nottingham is centrally placed to service any part of the UK, our quick lead times and inhouse transportation gives the reassurance needed when the deadline is tight.

In these pages we have formulated an easy to use guide outlining the standard modules and specifications to help you plan your next job, to speed up the quotation times we have also formulated a retail pricing structure based on an industry standard specification although we can happily quote any size, material and specification that is required.

If you require and further information or prices please contact one of our expert sales team:
